Necessity was required for the PPA because Courtenay Wind Farm LLC, the owner of the Project, is not a public utility.

Due to changed circumstances described in the enclosed Applications, the Company seeks to purchase the Courtenay Project from Courtenay Wind Farm LLC and develop, construct, own, and operate it. As a public utility operating in North Dakota, the Company respectfully requests a Certificate of Convenience and Public Necessity for the Project and transfer of the Certificate of Site Compatibility to the Company.

The Company's Application contains trade secret information. In accordance with Section 69-02-09-02 of the North Dakota Administrative Code, an Application for Trade Secret Protection is being provided along with a single copy of the trade secret version of the Application and supporting testimony in a sealed envelope marked **TRADE SECRET-PRIVATE**.

An original and nine copies each of the public versions of our Applications are also being provided, along with the following:

- CD containing the public versions of the Application for a Certificate of Public Convenience and Necessity, Application for Transfer of the Certificate of Site Compatibility, and for Application for Trade Secret Protection; and
- To expedite the proceedings, a filing fee of \$175,000, as provided for in N.D.C.C. § 49-03-02.

We look forward to working with the Commission in the review of this filing.
